 Portfolio Website

### SUMMARY

Full-Stack Developer (Angular, React, Node.js, MongoDB) with 3+ years building scalable web applications. Strong in JavaScript, REST APIs, and Agile workflows, delivering reliable and production-ready solutions.

### PROFESSIONAL EXPERIENCE

#### Full-Stack Developer, Biocipher Technologies

03/2023 – Present

- Developed scalable UI components using Angular and React for applications.
- Built REST APIs with Node.js and Express for smooth operations.
- Delivered features through CI/CD pipelines in Agile development teams.

#### Associate Software Engineer, Synoriaq

01/2022 – 08/2022

- Developed responsive front-end modules using Angular and React frameworks.
- Contributed backend API logic using Node.js for feature development.
- Improved app performance through targeted optimization and refined code.

### EDUCATION

#### B.Tech in Information Technology,

2022

J.C. Bose University of Science & Technology, YMCA

### TECHNICAL SKILLS

#### Programming Languages

JavaScript (ES6+)  
TypeScript

#### Frameworks & Libraries

Angular  
React  
Redux

#### Markup & Styling

HTML5  
CSS3  
Bootstrap  
Tailwind CSS

#### Testing

Jest

#### API Integration & Tools

RESTful APIs  
JSON  
Postman

#### Version Control & Dev Tools

Git  
GitHub  
GitLab  
VS Code

#### Backend Development & Database

Node.js  
Express.js  
MongoDB

#### Development Practices

Agile, Scrum  
SDLC  
CI/CD  
Component-Based Architecture

## PROJECTS

---

### **CRM + WebRTC Platform, [LINK](#)**

- Built a full-featured CRM with responsive UI using Angular and real-time data binding.
- Integrated **JsSIP WebRTC calling** to enable in-browser audio communication with live call events.
- Developed workflow automation and API-driven actions using RESTful microservices.
- Implemented real-time updates for leads, call logs, and agent activities.

### **Pixabits (CPaaS) - Cloud Communication Platform, [LINK](#)**

- Developed multichannel communication modules including SMS, Email, WhatsApp, Voice, and RCS.
- Built a dynamic campaign manager supporting scheduling, analytics, and real-time delivery tracking.
- Created interactive dashboards with reusable Angular components and live API data.
- Improved platform performance with optimized state management and modular architecture.
