

BHARTI KUMARI

Full Stack Developer

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience in full stack development, building scalable SaaS and real-time applications. Skilled in Angular, React, Node.js, Express.js, and MongoDB. Strong expertise in REST API development, microservices architecture, and scalable system design. Focused on performance optimization and high-performance applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript	Frontend: Angular, React, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js	Database: MongoDB
Technologies: REST APIs, Microservices, WebSockets, Real-Time Applications	Tools: Git, GitHub, GitLab, Postman, VS Code
Practices: CI/CD, Agile, Scrum, SDLC, Component Architecture	Testing: Jest

EXPERIENCE

FULL STACK DEVELOPER 03/2023 to 03/2026

Biocipher Technologies Private Limited, Gurugram, India

- Engineered scalable web applications using Angular and React, improving development efficiency by 25%
- Designed high-performance REST APIs and backend services using Node.js and Express.js, reducing response time by 30%
- Built real-time applications using WebSockets for dashboards, live tracking, and real-time data processing
- Implemented microservices architecture to build scalable and maintainable backend systems
- Optimized application performance and reduced latency by 20% using efficient state management and API optimization
- Automated CI/CD pipelines, improving deployment efficiency by 40%
- Created responsive UI components, enhancing user experience and application performance
- Collaborated with cross-functional teams to deliver scalable end-to-end solutions in Agile environment

ASSOCIATE SOFTWARE ENGINEER 01/2022 to 08/2022

Synoriq, Jaipur, India

- Crafted scalable frontend applications using Angular and React, improving application performance and reducing UI load time
- Produced backend APIs and services using Node.js and Express.js for efficient data processing

- Enhanced system performance and stability through debugging and performance tuning
- Facilitated backend integration and scalable data flow across multiple modules
- Delivered efficient and scalable features within deadlines, ensuring high-performance application delivery

EDUCATION

JC Bose University of Science & Technology, YMCA, Faridabad, India
Bachelor of Technology, Information Technology, 08/2022

PROJECTS

CRM + Web Real-Time Communication Platform [LINK](#)

- Established scalable CRM system using microservices architecture for lead management, agent tracking, and dashboard interfaces
- Designed interactive dashboards to manage incoming leads and monitor user activity efficiently
- Enabled real-time communication using Web Real-Time Communication for calling features
- Improved frontend performance and REST APIs for better scalability and responsiveness

CPaaS Platform (Communication Platform as a Service) [LINK](#)

- Constructed distributed system using microservices architecture for SMS, Email, WhatsApp, Voice, and RCS communication
- Executed campaign management system with scheduling, analytics, and real-time tracking
- Generated live dashboards with charts and graphs for real-time data visualization and monitoring
- Utilized event-driven architecture for high-throughput message processing
- Structured scalable backend services using Node.js and Express.js to handle concurrent requests efficiently
